Eligible for DoW Secret Clearance

PROFESSIONAL SUMMARY

Cybersecurity graduate (B.S. Cybersecurity Management, May 2026) with hands-on experience protecting organizations through risk management, compliance, employee training, and day-to-day IT support. Results include reducing employee susceptibility to email scams by **52%** and cutting unapproved technology use by **55%**. Known for strong ownership, clear communication, and turning complex risks into practical guidance for any audience.

EDUCATION

Nova Southeastern University — Davie, FL August 2022 – May 2026

Bachelor of Science in Cybersecurity Management | Minor in Data Analytics

EXPERIENCE

Cyber Risk & Compliance Analyst June 2026 – Present

Cari-Med Limited — Kingston, Jamaica

- Developed, reviewed, and updated **4** information security **policies**, procedures, and standards; mapped controls across **5** overlapping compliance **frameworks** (NIST 800-53, ISO/IEC 27001, SOC 2, GDPR, HIPAA) to reduce redundancy.
- Conducted third-party risk assessments on **6 vendors** and cloud providers, documented risks in the corporate risk register, and supported **2 audits** as liaison for external auditors.
- Built a local AI tool that increased team productivity by **26%** and **reduced Shadow IT usage by 55%**.
- Ran phishing simulation campaigns and trained employees on cyber hygiene, reducing phishing success rate by **52%**.
- Utilized Darktrace for threat detection and network monitoring.

Junior IT Staff December 2024 – June 2026

Cari-Med Limited — Kingston, Jamaica

- Delivered first-line technical support to **200 staff** across **4 locations**, covering hardware, software, and network systems and connectivity troubleshooting.
- Imaged and re-imaged **50+ desktops and laptops** for new hire onboarding and hardware refreshes; provisioned user access for **20+ users**.
- Assisted senior IT staff with **20** system **upgrades and patches**; maintained equipment lifecycle documentation, data backups, and routine system maintenance.

PROJECTS

StintMind — AI Motorsport Race Strategy & Security Platform May 2026 – Present

Personal Project

- Independently designed and built a Python desktop application that ingests real-world GPS and telemetry data from a RaceBox device, using an ML pipeline to predict tire degradation and lap-time evolution; currently in active use and open to other drivers for testing.
- Designed and implemented a full CIA-triad security architecture (AES-256-GCM encryption, HMAC-SHA256 frame integrity) and delivered recommendations through a custom PyQt6 interface.

Tech: Python, PyQt6, Machine Learning, AES-256-GCM, HMAC-SHA256

TECHNICAL SKILLS

Programming & Data: Python, C#, PyQt6, Java, HTML, CSS, SQL, Tableau, Data Analysis

Cybersecurity: SIEM, Splunk, Darktrace, SentinelOne, Netskope, Avanan, BullPhish, DLP, Web Filtering, Shadow IT, Staff Training, Wireshark, Blue Team Operations, Threat Detection, Reverse Engineering, Malware Analysis, CyberChef, John the Ripper, Network Monitoring

Systems: Linux, Windows Administration, Help Desk Service, Microsoft 365, Microsoft Entra ID, Microsoft Intune, Microsoft Azure, macOS, Virtual Machines, OS Internals (Processes, Threads, Virtual Memory)

Professional: Technical & Non-Technical Communication, Rapid Self-Directed Learning, Safe Malware Handling
